

CURIOUS ABOUT PROGRAMMING?

Workshop: Get started using Python

In a two-hour workshop, we will explain the basics of programming and provide you with the knowledge you need to get started with Python and Jupyter Notebook. Python is an easy to learn programming language that has quickly grown into one of the biggest in the world, loved by beginners and experts alike. It is widely used in various fields and the workshop will give you many examples of its uses and applications.

The workshop does not require any previous programming skills and targets beginners and others interested. All you need to bring is your own computer.

Maximum number of participants per occasion: 15
