Information about digital exams for students

Linköping University is introducing digital exams during 2019. This service will use a web-based solution called WISEflow and we expect most students to use their own laptops. In order to connect to WISEflow (during the exam) you must install a secure web browser called FLOWlock. This document contains a short check list for students who are about to take digital exams.

**When you start the course**

- Download FLOWlock and check that you have the correct version. You can do this by logging into [http://europe.wiseflow.net](http://europe.wiseflow.net) using your LiU-id and the authentication method eduGAIN. In the upper right corner, you can see your name and there you can select to *Edit profile*. On the tab *System requirements*, you can select to download FLOWlock.
• Check that you can connect to the wireless network *eduroam* with your computer. Please note that *eduroam* and *LiU* are two different networks. Eduroam has a separate password that you can get from [http://minit.liu.se](http://minit.liu.se).
• Select *Connect automatically* for eduroam.
• Take a demo exam (demo flow) to see how WISEflow works. You can find these by clicking the *Demo flows* button at the bottom of the *Flow Overview* page in WISEflow.

You can get FLOWlock for Windows and MacOS X. Google Chrome is the recommended web browser to connect to WISEflow. If you do not have an updated laptop with Windows or MacOS X, we suggest that you book a guest computer. There is a limited number of guest computers available for booking for each exam.

**Ten days before the exam**

The last day for booking a guest computer is the same day as the deadline for registering for the exam. Send your request for booking to *tenta@liu.se*. Don’t forget to state which exam you are taking (i.e. the course code).

**During the exam**

• Bring your own power cable and connect it.
• If you want to, you can bring an external mouse and/or keyboard.
• Be there on time! Doors will open half an hour before the start. If there is a problem with the computer, there will be time to fix the problem or to get an extra guest computer.
• Login to WISEflow and start the flow as soon as you are set up.

**Some extra tips**

• Sometimes you can get a warning message that you have lost the connection to eduroam. Usually, you are reconnected automatically, if your computer is setup that way. If you are not reconnected, the exam will be saved locally on your computer. Contact an invigilator if the problem persists.
• If you want to add attachments to the exams, please remember that these are connected to a specific question. As you move to another question, you will no longer see that attachment, but it has been saved. You can e.g. take a photo of your notes using the web cam and attach it, if the examiner has set up the exam to allow it.

If you have questions on digital exams, please contact LiU IT Support, *helpdesk@liu.se*.
